<b>List of Figures</b>	<b>xxii</b>
<b>List of Tables</b>	<b>xxiii</b>
<b>List of Symbols</b>	<b>xxv</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Evolution of Piled Raft Foundation . . . . .	3
1.2 Classification of Piled Raft Foundation . . . . .	10
1.3 Design Aspects of Piled Raft Foundation . . . . .	11
1.3.1 Design considerations . . . . .	11
1.3.2 Features of piled raft foundation . . . . .	12
1.3.3 Applicable scenarios for piled raft foundation . . . . .	12
1.3.4 Design philosophies . . . . .	13
1.3.5 Load-settlement behaviour . . . . .	16
1.4 Exploration of the Research Goals . . . . .	21
1.5 Organisation of the Thesis . . . . .	22
<b>2 Literature Review</b>	<b>25</b>
2.1 Introduction . . . . .	25
2.2 Design Approaches of Piled Raft Foundation . . . . .	26
2.2.1 Simplified Approaches . . . . .	26
2.2.2 Approximate Approaches . . . . .	36
2.2.3 Numerical Approaches . . . . .	44
2.2.4 Variational Approaches . . . . .	58
2.2.5 Experimental Studies . . . . .	60
2.3 Summary . . . . .	64
2.4 Research Gap and Objectives . . . . .	68
<b>3 Numerical Investigation of Piled-Raft Foundation Behaviour</b>	<b>71</b>
3.1 Introduction . . . . .	71
3.2 Modules of Finite Element Modelling in ABAQUS . . . . .	73
3.3 Modelling of Piled-Raft Foundation System in ABAQUS . . . . .	76
3.3.1 Geometric modelling . . . . .	76
3.3.2 Material modelling . . . . .	77
3.3.3 Modelling of the interfaces . . . . .	79
3.3.4 Selection of 3D element type . . . . .	82
3.3.5 Meshing of the model . . . . .	83

3.3.6	Step time incrementation . . . . .	84
3.4	Validation of the model . . . . .	84
3.5	Parametric analysis of piled raft foundation . . . . .	88
3.5.1	Effect of length of piles ( $L_p$ ) . . . . .	92
3.5.2	Effect of diameter of piles ( $d_p$ ) . . . . .	93
3.5.3	Effect of friction angle ( $\phi$ ) . . . . .	94
3.5.4	Effect of elastic modulus of soil ( $E$ ) . . . . .	95
3.5.5	Effect of Poisson's ratio ( $\nu$ ) . . . . .	96
3.5.6	Effect of number of piles ( $n_p$ ) . . . . .	97
3.5.7	Effect of raft thickness ( $t_r$ ) . . . . .	98
3.6	Summary . . . . .	99
<b>4</b>	<b>Experimental Investigation of Load-Sharing in Piled-Rafts</b>	<b>103</b>
4.1	Introduction . . . . .	103
4.2	Testing materials and equipment . . . . .	104
4.2.1	Test soils . . . . .	104
4.2.2	Raft and Piles . . . . .	106
4.2.3	Soil Bin . . . . .	110
4.2.4	Loading Mechanism . . . . .	110
4.3	Test procedures . . . . .	111
4.3.1	Preparation of soil bed . . . . .	111
4.3.2	Driving of piled-raft . . . . .	113
4.3.3	Taking observations . . . . .	114
4.4	Results and discussions . . . . .	114
4.4.1	Effect of number of piles ( $n_p$ ) . . . . .	115
4.4.2	Effect of pile length ( $L_p$ ) . . . . .	115
4.4.3	Effect of pile numbers in pile groups . . . . .	116
4.4.4	Comparison between raft, piles and piled-raft . . . . .	118
4.4.5	Load Improvement Ratio . . . . .	120
4.4.6	Load Sharing Ratio ( $\alpha_p$ ) . . . . .	122
4.4.7	Comparison between experimental and numerical results . . . . .	125
4.4.8	Limitations of the experimental study . . . . .	126
4.5	Summary . . . . .	128
<b>5</b>	<b>Formulation of Predictive Models for Interaction Factors</b>	<b>131</b>
5.1	Introduction . . . . .	131
5.2	Interactions in Piled Raft Foundation . . . . .	135
5.3	Overview of the Experimental Analysis . . . . .	136
5.4	Assessment of Interaction Factors . . . . .	137
5.4.1	Pile-Pile interaction factor ( $\alpha_{pp}$ ) . . . . .	137
5.4.2	Pile-Raft interaction factor ( $\alpha_{pr}$ ) . . . . .	139

5.4.3	Raft-Pile interaction factor ( $\alpha_{rp}$ ) . . . . .	141
5.5	Summary . . . . .	144
<b>6</b>	<b>Conclusions and Future Scope</b>	<b>147</b>
6.1	Introduction . . . . .	147
6.2	Conclusions . . . . .	149
6.3	Potential avenues for future research . . . . .	153
